

Offer Support

St. Andrew's Community Hospital (SACH) is dedicated to provide affordable healthcare to the community. We are committed to care for all in need, regardless of race, religion or socio-economic status. As a voluntary welfare organisation, SACH relies on the generosity of the public to provide subsidised care for our patients. We look forward to your support to continue our legacy of caring for the community.

To make a donation, a crossed cheque made payable to "St. Andrew's Community Hospital" can be sent to:

ST. ANDREW'S
COMMUNITY HOSPITAL

Dementia Care Programme

St. Andrew's Community Hospital (SACH) offers subsidised rehabilitative and sub-acute care for adult and paediatric patients after their acute phase of treatment at an acute care hospital. In order to cater to patients needing rehabilitative or sub-acute care, and who also suffer from dementia, SACH launched a Dementia Care Programme to provide care for them in a conducive and effective environment.

The Sunflower Ward (level 4)

SACH renovated the Sunflower Ward at level 4 to provide patients with dementia a home-like environment where they can participate in a variety of activities rather than being a passive recipient of care. Some of the ward's key features are:

- Increased space for therapy and group activities
- Mobile nursing work stations to facilitate frequent nurse-patient interaction
- Communal dining area to promote interaction and socialising
- Multi-sensory room to pacify patients who might be agitated
- Placement of reminiscence items throughout the ward to evoke familiar memories
- Therapy garden to promote physical activities
- Security features to ensure patient safety

Person-Centred Care

The dementia care programme at SACH is person-centred; offering customised therapy sessions (physiotherapy, occupational therapy, speech therapy and music therapy) and social programmes to provide meaningful activities to engage the patient in everyday life. Before being discharged from SACH, guidance on home modification and caregiver training are provided as part of a comprehensive programme to empower the family member to better care for the patient back at home.

Admission by Referral

Admissions to SACH for persons with dementia requiring rehabilitative or sub-acute care are by referrals only. The referral may be initiated by the doctor of the acute care hospital that the patient is receiving care from.
